## **DETAILED ACTION**

### ***Remarks***

This Office action is responsive to applicant's amendment filed November 10, 2004.

### ***Claim Rejections - 35 USC § 102 and 103***

The rejection of claims 1 and 5-10 under 35 U.S.C. 102(b) based on Tajima et al. (U.S. Pat. 5,334,463) has been withdrawn.

The rejection of claims 2 and 4 under 35 U.S.C. 103(a) based on Tajima et al. and Iwasaki (U.S. Pat. 6,447,939 B1) has been withdrawn.

The rejection of claim 3 under 35 U.S.C. 103(a) based on Tajima et al., Iwasaki and Fetterman (U.S. Pat. 3,753,780) has been withdrawn.

The rejection of claims 11 and 12 under 35 U.S.C. 103(a) based on Tajima and Kawatsu (U.S. Pat. 5,677,073) has been withdrawn.

### ***Allowable Subject Matter***

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest the claimed fuel cell apparatus having, in a first embodiment, a step-up circuit provided between an electricity accumulator and a load connected to a fuel cell, and having, in a second embodiment, an electricity accumulation circuit connected in parallel to a fuel cell with respect to a load connected to the fuel cell.

Art Unit: 1745

By the claimed “step-up circuit provided between an electricity accumulator and a load”, the examiner interprets this feature as being structurally equivalent to the step-up circuit being *in series* with the electricity accumulator to the load [emphasis added] consistent with applicant’s arguments on page 8 first full paragraph therewith. The examiner acquiesces with applicant’s remarks in comparing the claimed invention with the teachings of Tajima et al. (*ib*)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
